

Initiation of Sulfuryl Fluoride Reevaluation

Denise Webster
Program Specialist, CDPR
July 18, 2008

Photo obtained from Dow AgroSciences' Web site.

Background

- Risk assessment on inhalation exposure completed in July 2006.
- Certain exposure scenarios were determined using health-protective factors.
- TRAP plan is based on reentry of 5 ppm.

Photo obtained from Dow AgroSciences' Web site.

Background

- Current product labeling and CA regulations require workers wear SCBA until air levels are below 1 ppm.
- Data is needed to assess whether the TRAP plan is adequate.

Registrants

Dow AgroSciences LLC
Vikane, EPA Reg. No. 62719-4

Ensystex II, Inc.
Zythor, EPA Reg. No. 81824-1

Drexel Chemical Company
Drexel Master Fume, EPA Reg. No. 19713-596

Data Requirements

- Worker exposure monitoring data of structures treated at maximum label rates.
- Residential post-application monitoring until measurements are below the level of detection.
